

Abstract

[0076] A method and apparatus for combining a liquid material and a filler and the composition prepared from the method. A method is also provided for pre-treating the filler, prior to combining with the liquid material. A spray gun is provided for mixing and spraying the liquid material and the filler, the spray gun nozzle having an inner chamber carrying the liquid material and an outer chamber carrying the filler material, the outer chamber surrounding the inner chamber, whereupon leaving the nozzle, the filler and liquid materials combine.
